

Horváth Study

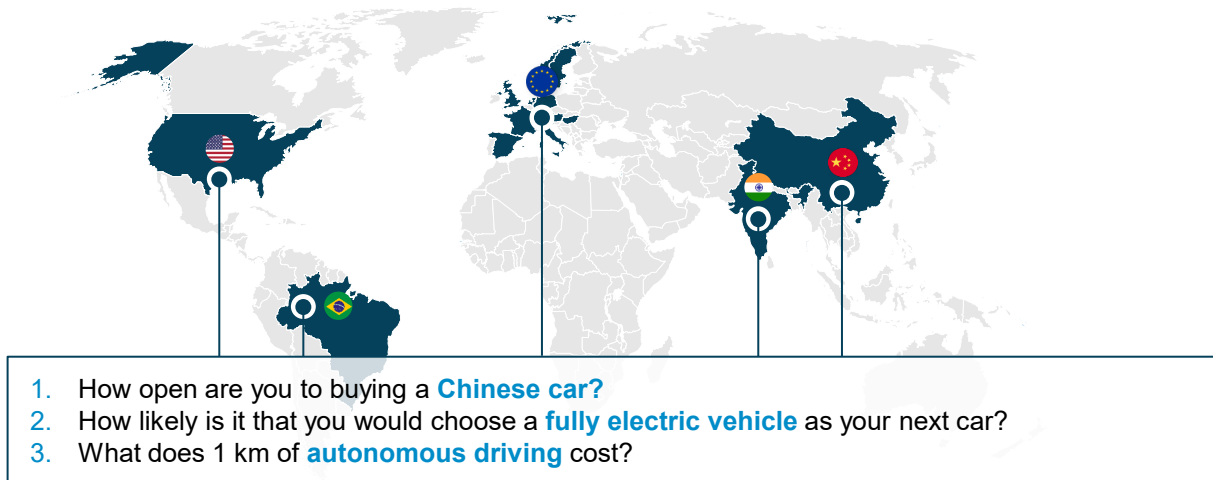

CUSTOMERS & MARKETS SURVEY

STUDY RESULTS WINTER EDITION 2026

Overview of Scope and Content

Scope of Horváth's Customers & Markets Survey – Winter Edition 2026

Sample questions from this study

4,400+
people surveyed

16
countries in scope

Representative survey
by gender, age, region, etc.

Study goal

- The aim of this Horváth study is to gain detailed insights into **expectations and opinions of automotive customers worldwide**
- To achieve this, we identified the **most relevant topics from the customers' perspective**

Study scope

- **Recurring questions** in the same countries to identify developments and trends
- **Pulse check on current topics** that move the industry and customers
- **Global approach** in the five major automotive markets/regions (Europe, U.S., China, India, and Brazil)

Study content

- **News and insights** into the latest developments and trends in customer expectations
- The survey is divided into four subchapters on the most important topics in the industry: **China & Chinese OEMs, BEVs, Sales & After-sales, and Future of Mobility**

We analyzed over 4,400 customer opinions in Europe, U.S., China, Brazil and India

01

A View on Chinese OEMs in Europe

Sample questions:

- ① "Would you be **open to buying** your next car from a **Chinese brand**?"
- ② "Which Chinese car brand(s) **do you know**?"
- ③ "Which Chinese car brand(s) would you **consider**?"
- ④ "Why would you consider a Chinese car? **Why not**?"
- ⑤ And many more ...

02

A View on BEVs in Europe

Sample questions:

- ① "Would you **choose a fully electric vehicle** as your next car?"
- ② "Why would you be **likely** to choose a fully electric car next? **Why unlikely**?"
- ③ "How do you **value used electric vehicles** compared to **used ICE vehicles**?"
- ④ "What is your **minimum expectation** for the **real kilometer range** of an electric car?"
- ⑤ And many more ...

03

Sales & Aftersales Customer Behavior

Sample questions:

- ① "What are the **most important criteria** for you when choosing a car?"
- ② "What are the **most important criteria** for you when choosing a used car?"
- ③ "What are your **main reasons** for potentially **postponing the purchase** of a new vehicle?"
- ④ "Which **type** of electric vehicle drive system **would you consider** for your next purchase?"
- ⑤ And many more ...

04

A View on Future Mobility

Sample questions:

- ① "When do you believe **fully autonomous vehicles** will be **part of daily transportation** in your country?"
- ② "How **open** are you to **using autonomous vehicles** in the next 10 years?"
- ③ "At what **monthly price** for equally convenient mobility options would you **consider giving up your private car**?"
- ④ "What currently **prevents you** from using **alternative mobility options** more frequently?"
- ⑤ And many more ...

Customers & Markets Survey

A View on Chinese OEMs

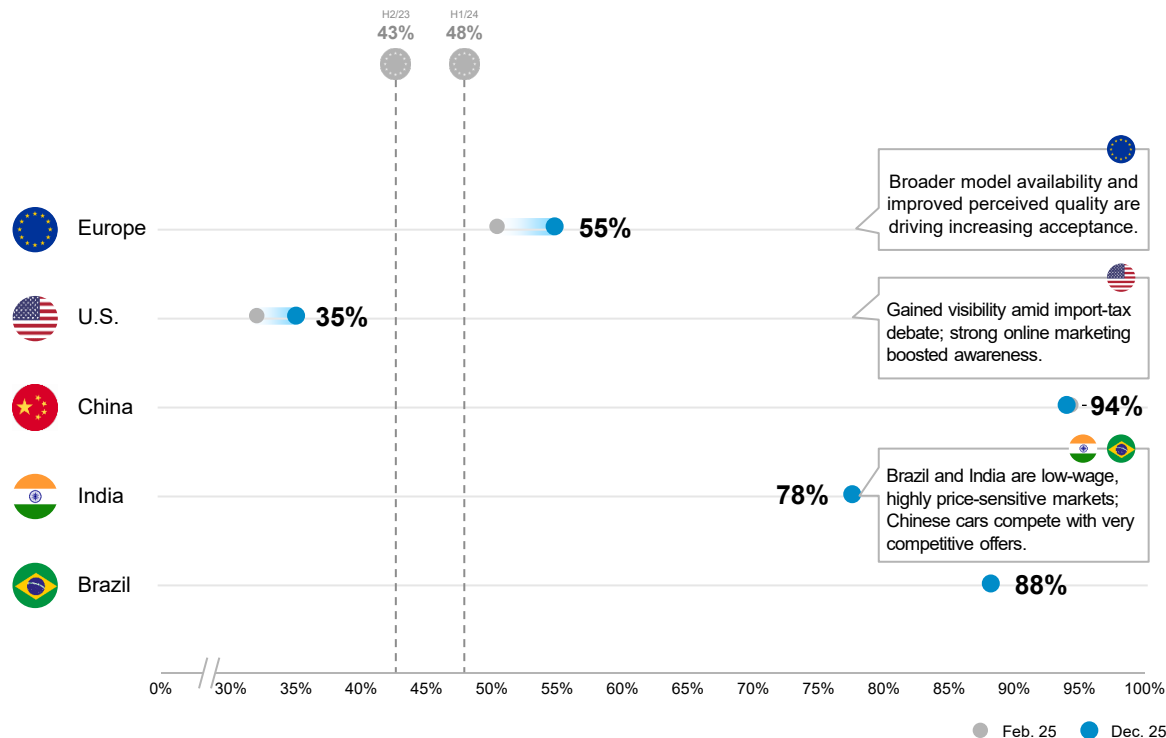

Would you be open to buying your next car from a Chinese brand?

“Yes, absolutely!”

“Yes, maybe!”

Note: Only “Yes, absolutely” and “Yes, maybe” were considered; n= 4,400.
The Brazilian and Indian markets have been newly added to this study, which is why there are no old comparative values.

Global openness towards Chinese car brands varies widely. While **Europe** now reaches a consolidated 55%, **emerging markets** such as **India** (78%) and **Brazil** (88%) exhibit substantially **higher acceptance levels**. The **U.S.** remains significantly **more cautious** at 35%.

Customers & Markets Survey

A View on Chinese OEMs

Would you be open to buying your next car from a Chinese brand?

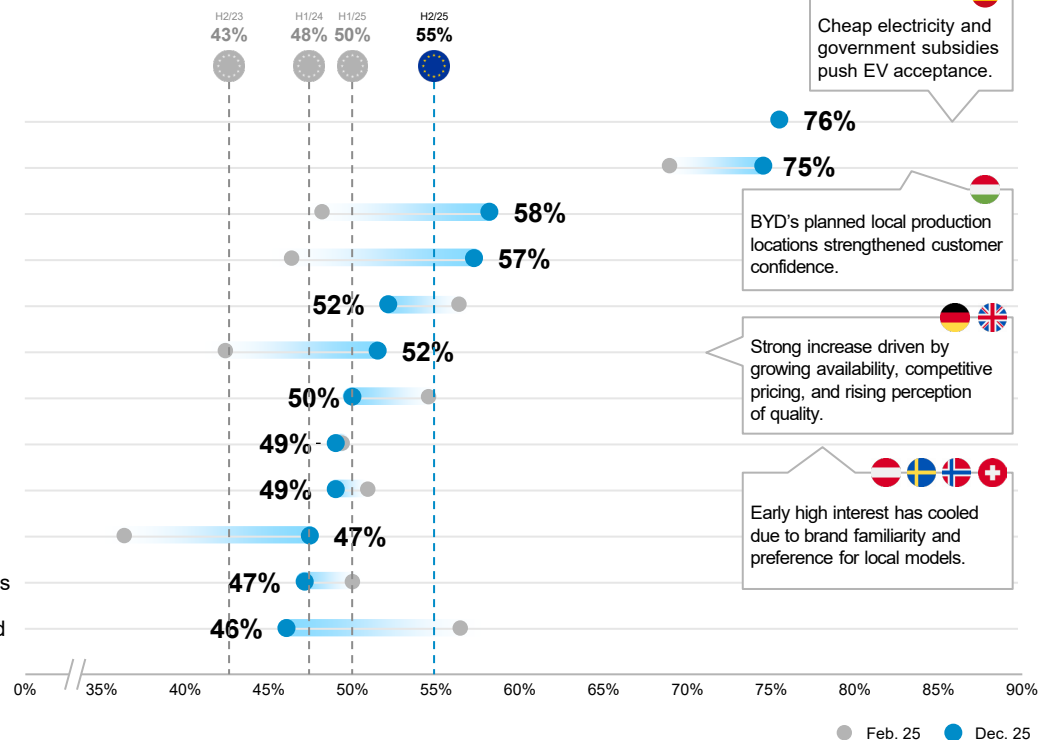

“Yes, absolutely!”

“Yes, maybe!”

Note: Only “Yes, absolutely” and “Yes, maybe” were considered; n= 2,500.
The Spanish market has been newly added to this study, which is why there are no old comparative values.

- Spain
- Hungary
- Denmark
- U.K.
- Italy
- Germany
- Sweden
- Austria
- Norway
- France
- Netherlands
- Switzerland

Fifty percent of **Europeans** can now imagine buying a **Chinese vehicle**, with openness rising from 43% to 55% since October 2023. **Hungary** and **Spain** stand out as **clear frontrunners**, as **three out of four people** in both countries are open to buying a Chinese vehicle.

Customers & Markets Survey

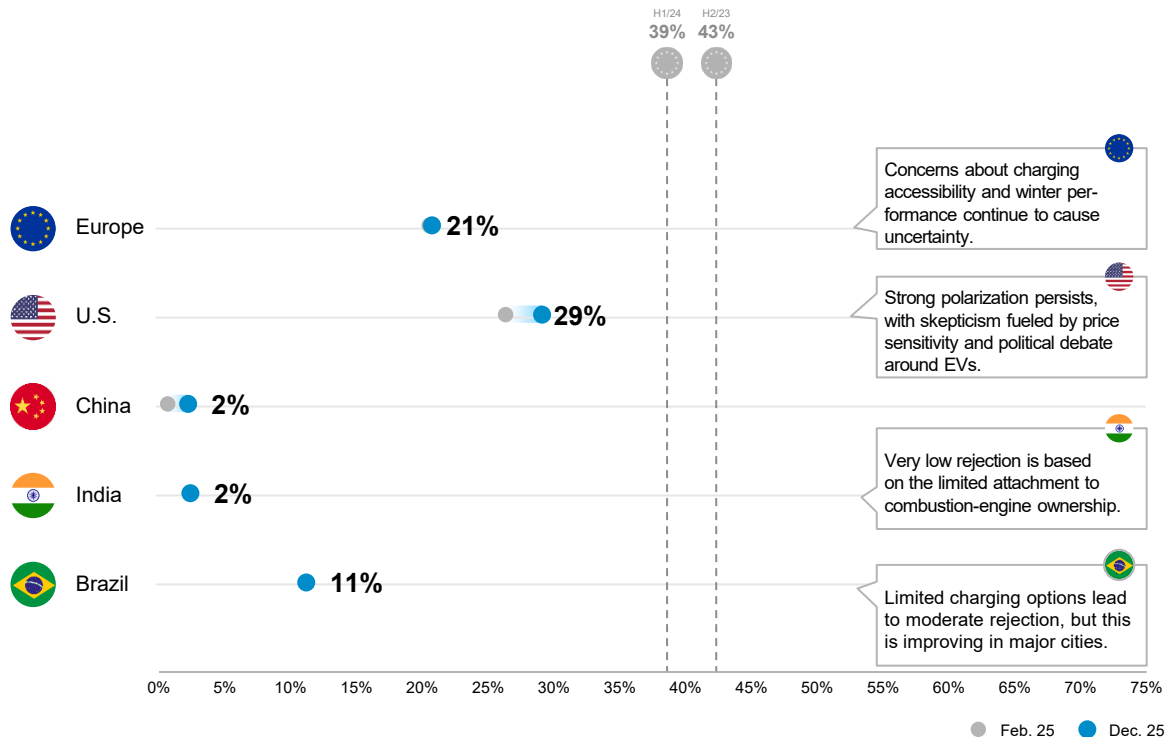

A View on BEVs

Would you choose a fully electric vehicle as your next car?

“No, absolutely not!”

Note: Only “No, absolutely not” was considered; n= 4,400. The Brazilian and Indian markets have been newly added to this study, which is why there are no old comparative values.

Around **one in five** consumers in **Europe** and nearly **one in three** in the **U.S.** rule out **buying** a **BEV**. In contrast, **China** and **India** show almost **no outright rejection**, highlighting strong confidence in EV technology in both markets.

Customers & Markets Survey

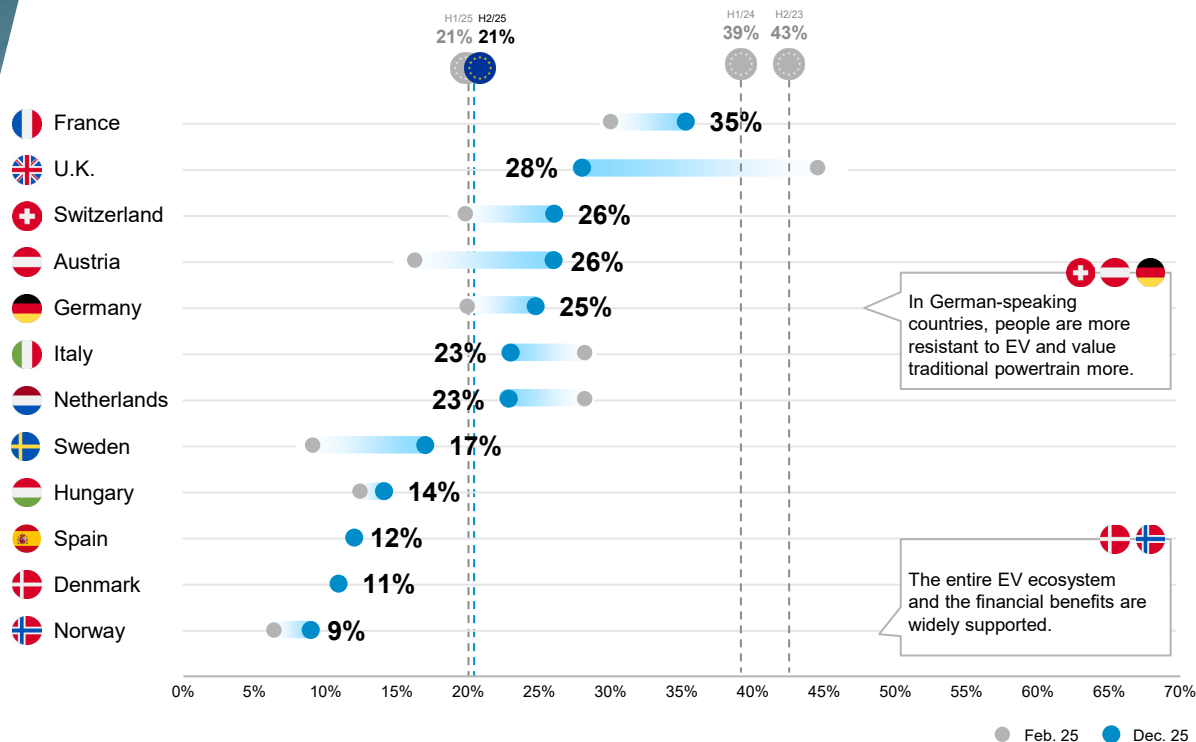

A View on BEVs

Would you choose a fully electric vehicle as your next car?

“No, absolutely not!”

Note: Only “No, absolutely not” was considered; n= 2,500. The Spanish market has been newly added to this study, which is why there are no old comparative values.

The number of people who **can't accept BEVs at all** remains broadly **stable** across regions with a slight increase. Given their current stance, this group is **unlikely** to be a **near-term target** for effective conversion by EV providers.

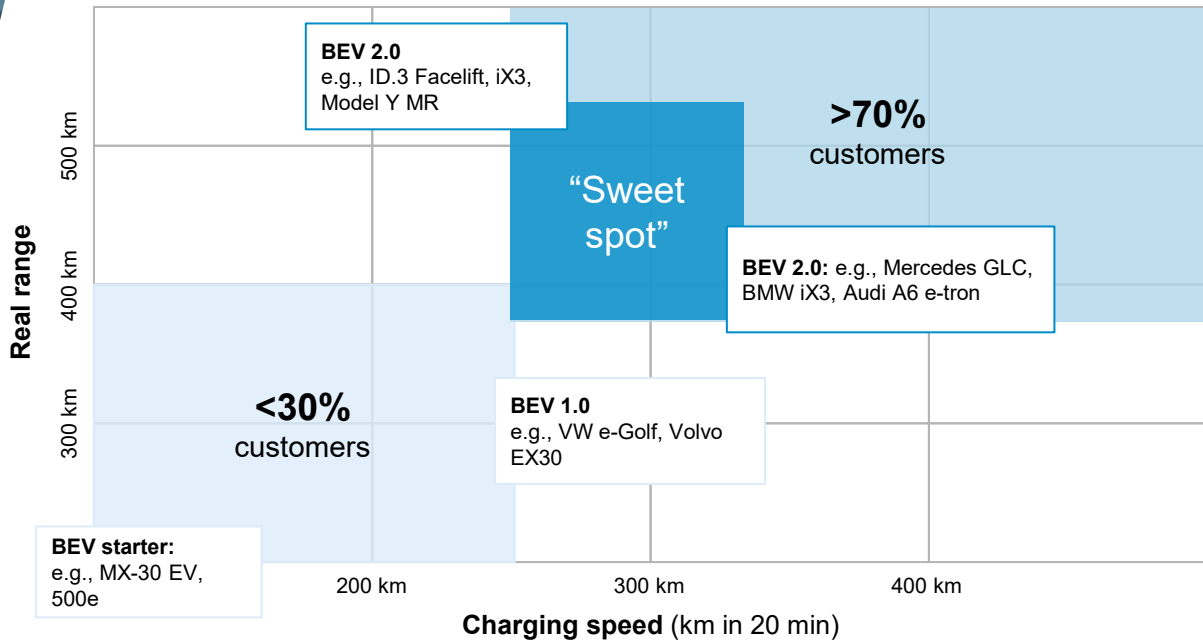

Customers & Markets Survey

A View on BEVs

Customer expectations matrix for real range and charging speed

The “sweet spot” for the combination of real range and charging speed has **shifted slightly this year**. Customers still **accept the real range of 380 km**, while expectations for charging speed remain consistent at **250 – 350 km in 20 minutes**.

Note: n= 2,516

Customers & Markets Survey

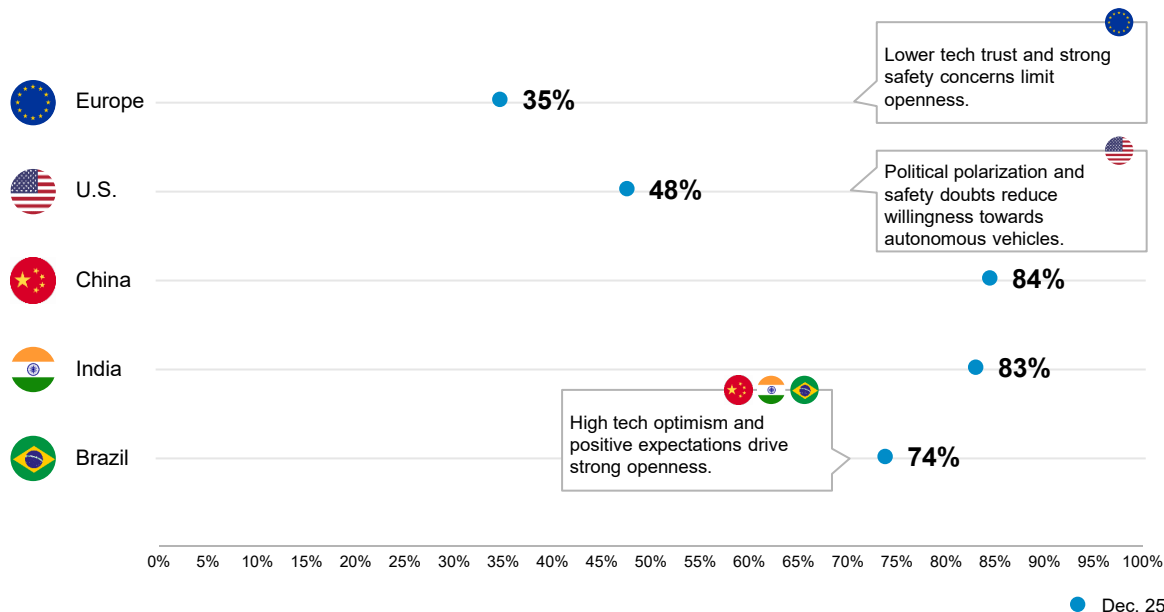

A View on Future Mobility

In general, how open are you to using autonomous vehicles in the next 10 years?

“Very open”
“Open”

Note: n= 4,400

China and **India** are the clear **frontrunners** in **openness** towards autonomous vehicles, with **over 80%** of consumers expressing a positive attitude. In **Brazil**, nearly **three out of four** respondents are open, while in the **U.S.** it's roughly **one in two**. **Europe** shows the highest **skepticism**, with only 35% indicating openness.
